Abstract: This the paper on analysis of the quality of teaching at university level because of weak faculty member joining the institute and it spoil the student career. Even such faculty members are not serious in his / her work. They are not technically strong and they are not mature. Hence they need proper training at the induction level and make then perfect. It is well known that no one is perfect in his work & everyone tries to improve the quality teaching at University level. This paper discusses as to what changes must be made at top level. The purpose is to provide meaningful technical resource to this country.

Keywords: Negative faculty member, Poor education, Up-gradation of teaching methodology.
