Although many people still consider traditional ways of education systems but online learning is being more and more practiced. it represents an easy and comfortable method to achieve knowledge in almost every field, but it as disadvantages like, online courses cannot cope up with large number of students if there is no one to supervise them. In order to provide a good e learning environment to the students of a particular institute we propose a system that is (STUDENT WORLD). The main aim of this system is to implement a website for students to get updated with required information and study materials according to various departments and also provide communication between faculties and students. This website provides students with all kind of study materials and other technical as well as non-technical aspects. Student World is a portal which considers students as the main target users & provides many useful services to students at a single unified place.

Keywords— *online education; e-learning, information and communication technology*
